

## VoiceMail-systems for companies and working units tiptel 350 ISDN and tiptel 350-10 ISDN

By means of the VoiceMail-systems tiptel 350 ISDN and tiptel 350-10 ISDN, small and middle-size companies can benefit from favourable memory solutions that can be compared to those of large telephone systems. Apart from the main answering machine, five / nine individual, PIN-protected voiceboxes can be set for your staff. Furthermore, it is possible to manage two incoming calls simultaneously, thus optimising the number of calls accepted. The recording capacity

can be increased to achieve up to five hours so that sufficient memory is available for all voiceboxes.

In addition to that, a call list with 100 entries each as well as a general call filter are available. A complex time control function allows to activate voiceboxes according to the time set before and to correspondingly change the welcome message. Incoming messages can – also due to this time control function – be transferred to mobile phones.

**tiptel 350 ISDN**  
**tiptel 350-10 ISDN**

VoiceMail-systems

- up to 5 (tiptel 350 ISDN), 9 (tiptel 350-10 ISDN) individual voiceboxes
- individual message transfer, time control function and call list for each voicebox
- 1 hour recording capacity available, can be increased to up to 5 hours
- 2-channel-system: 2 calls can be managed simultaneously
- easy operation via softkeys and menu guidance
- audio input and output, excellent playback quality

## tiptel 350 ISDN

## tiptel 350-10 ISDN

### tiptel 350 ISDN

#### Features

- 2-channel system: 2 callers can leave messages simultaneously
- 20 OGMs (1 pre-programmed OGM, 9 individual OGMs, 10 voicebox messages)
- audio input and output for recording of messages, e. g. studio messages and recordings
- internal S0 bus for two-way conversation recording and call transfer
- operation at a point-to-multipoint connection (EURO-ISDN)
- 60 minutes recording capacity available which can be increased by multi-media cards (5 hours via 64 MB card)
- voice-day-and-time-stamp

#### CLIP functions\*

- display of caller's name, if registered in the call filter
- assignment of 8 individual ringing tones to the entries in the call filter
- assignment of a maximum of 7 personal outgoing messages to the entries in the call filter

#### Message transfer

- In case of new incoming messages, a stored phone number is automatically dialled. The user can carry out a remote interrogation.

#### Integrated voice mail system with 5 voiceboxes

- 5 voiceboxes with 2 individual outgoing messages each
- remote interrogation possible for each voicebox via individual codes
- message transfer with individual destination number for each voicebox

#### Time control according to time and weekday

- activation / deactivation of the voicebox and of the message transfer function
- switching of outgoing messages
- a total of 10 switching times for each voicebox

#### Remote interrogation / remote control

- remote control via voice guidance
- remote room monitoring and remote loudspeaker function
- remote change of phone number for message transfer
- indication of caller's phone number (if transferred)
- programming of an individual 4-digit security code for each voicebox

#### Handling and special features

- lit graphic display (122 x 32 pixel)
- counter of incoming calls and messages in the display
- 4 softkeys for quick selection of functions

#### Call filter

- 100 entries with phone number and name
- ringing tones can be recorded individually and be assigned to certain entries in the call filter (vocal-CLIP)\*

#### Logbook

- call list per voicebox for the last 100 calls indicating date, time and phone number or name (if registered in the call filter), thus totalling to a maximum of 600 entries
- transfer of phone numbers to the call filter
- information on a successful call (call was established and a message recorded)

#### Call screening / two-way conversation recording / personal information (dictate)

- automatic two-way conversation recording of all or only of incoming calls (malicious calls)

#### Functions at the internal S0

- internal calls free-of-charge
- explicit call transfer (ECT)
- call pick-up
- ISDN features of the external S0 are also available internally

#### Software updates

- update of the operating software via telephone call (X.75), ca. 90 seconds

### tiptel 350-10 ISDN

#### same functions and features as tiptel 350 ISDN, however:

- 9 voiceboxes
- 28 OGMs (1 pre-programmed OGM, 9 individual OGMs, 18 voicebox messages)
- logbook for a total of 1,000 phone numbers

#### Accessories:

##### Multi-Media-Cards as memory extension

- tiptel MMC 1 (16 MB) + 1 hour
- tiptel MMC 2 (32 MB) + 2 hour
- tiptel MMC 4 (64 MB) + 4 hour

#### Technical data

- power consumption in the idle state: ca. 2 W
- W x H x D: 180 x 50 x 190 mm
- weight: 460 g
- data retention after power failure: > 10 years
- reserve capacity for the clock: > 36 hours
- output level "OUT": 150 mV / 10 KΩ
- input sensitivity "IN": 150 mV / 47 KΩ

\* If supported by the network-provider.
